# What is “SBG?”

Standards based grading (SBG) is an approach we use here at iTech to assesses your growth towards proficiency in clearly defined skills or outcomes (standards).

# Research Basis

Standards based grading attempts to offer a grade that:

- a. *Communicates meaningful feedback about specific academic proficiencies (Wormeli, 2006)*
- b. *Provides feedback on academic progress exclusively, not compliant behaviors (Scriffiny, 2008)*

# Research Basis

Standards based grading attempts to offer a grade that:

- c. Represents a student's mastery of a skill over time and multiple attempts (Marzano & Hefleblower, 2011)*
- d. Expresses student learning as demonstrated on high quality assessments rather than homework completion or extra credit (Stiggins, Frisbie & Griswold, 1989)*

# Why We Ventured In

1. DANGER. Saw a problem with gaps in learning.
2. Our system did not help us identify specific gaps.

# SBG: a Million Definitions

*We began to explore and found many definitions and as many questions.*

**Standards-based grading aims to make classroom grades more valid, reliable and transparent, ultimately providing an accurate reflection of what skills and knowledge students have mastered.**

**Students master the standards instead of accumulating points.**

I care about these, but...

- homework
- classwork
- tutoring
- peer instruction

...your grade comes from the

learning standards

## 5 QUESTIONS FOR EVERY STANDARDS-BASED GRADER

- What will you assess?
- How will you score?
- How will you assess?
- How will you weigh assessments?
- How will you reassess?

# Research

- Looked at a variety of research including Stiggins, Marzano, Wormeli and many more. Schools that used SBG.
- There is a lot out there and a lot of variety....

# A Few Constraints

1. Colleges accept grades.
2. Grades are currency.
3. SBG must transfer to A-F fairly and clearly.

# A Big Question

**Does averaging  
represent learning?**

# Things to think about

1. Assessing individual standards
2. Assessing combination of standards
3. Averaging hides performance

# Our Answer for Individual Standards

What is a decay?

Why decay?

Why decay to 75%

## **Another Big Question...**

**How do we convert  
individual standards to a  
letter grade?  
What are we really after?**

# Conjunctive Grades

How do you represent consistency of performance?

*We now know that averaging hides Performance deficits.*
